

August 26-28, 2026

9 AM - 5 PM

Coordenadoria de Pós-graduação -
Instituto de Biologia / Unicamp

Accessing and using spatiotemporal data: climate and satellite products

Theory:

- Intro to spatial and time series data
- Overview of climate and satellite products
- Electromagnetic spectrum, optical satellites, and vegetation indices

Practical:

- Working with spatial data in Google Earth Engine (GEE), R, and QGIS
- Accessing climate and satellite products from GEE
- Data processing steps in R

A workshop by Dr. Johanna Van Passel
(Ghent University, Belgium)
